

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

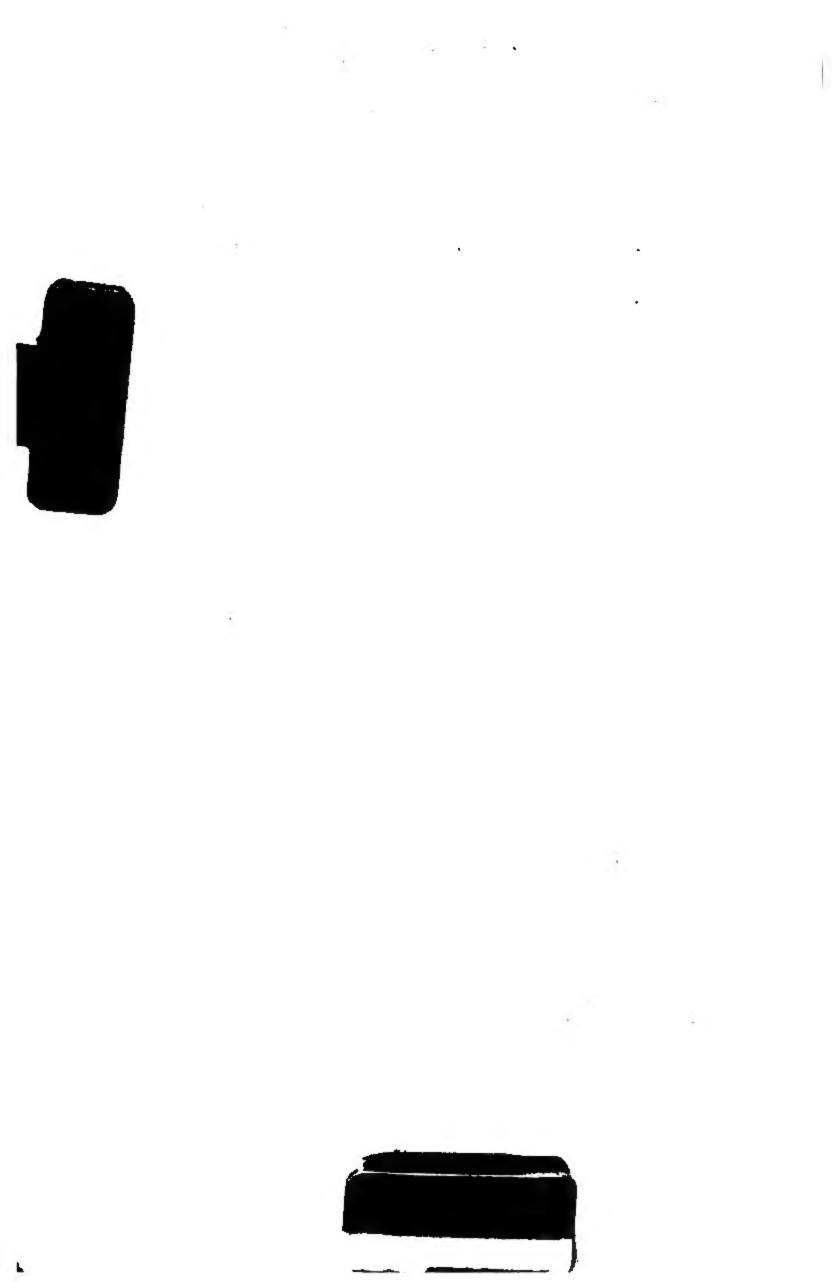

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + Make non-commercial use of the files We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + Maintain attribution The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## TABLE IX — WORKMEN'S COMPENSATION INSURANCE

#### Explanation of Table

Table IX consists of five parts and is designed to show the salient features of workmen's compensation underwriting as reported to the Department by workmen's compensation insurance carriers under various special schedules, several of which could not be finally audited before going to press. Throughout the table no deductions have been made for reinsurance or premiums charged off as uncollectible.

Part 1 relates to New York premiums and losses of all classes of carriers. This part covers the entire period from the inception of the New York Workmen's Compensation Law to December 31, 1920.

Part 2 relates to premiums and expenses of all classes of carriers for all states for the calendar year 1920. This part contains in addition a distribution of expenses in terms of ratios.

Part 3 shows the development of New York premiums and losses from year to year under all policies of stock and mutual companies issued in any calendar year. The first loss ratio for each policy year is not indicative because the majority of the policies are still in force at the end of the calendar year and the data contain estimated earned premiums in lieu of actual earned premiums. Even the development from the end of the first to the end of the second calendar year varies with each policy year because of the effect of changes in industrial conditions upon the relation between estimated and actual premiums.

Parts 4 and 5 are tests of the adequacy of the reserves for workmen's compensation losses of New York State mutual companies and the State Insurance Fund respectively. The reserves of mutual companies are set up in accordance with regulations issued by the Department pursuant to section 191 of the Insurance Law. The State Insurance Fund computes its reserves under rules approved by the Department pursuant to section 92 of the Workmen's Compensation Law. In the upper half of each

exhibit can be traced the development of the losses incurred in each calendar year according to successive annual revaluations. In the lower half the development of the total losses incurred in various periods can be traced from the first valuation through each subsequent revaluation.
